

F400 Karting Launches an Exciting New Class

More Power
More Torque
More Speed
More Affordable

F400 Karting is proud to announce the debut of the **F400+ class for the 2026 Season**, an all-new, high-performance class that raises the bar for competitive racing. Engineered for speed, consistency, and accessibility, the F400+ Class introduces a powerful **480cc engine** which represents a bold evolution from the current F400 specification.

The new **F400+ engine** delivers **15% more power** and **16% more torque** at **20% Less Cost**, translating into a significantly faster, more exhilarating on-track experience. Built for both seasoned racers and emerging talent, this class promises to deliver closer competition and unmatched reliability.

Unlike other open-spec classes, the **F400+ Class will be fully homologated** featuring standardized, sealed, and certified components supplied “ready to race.” This ensures total parity across the grid and puts the **emphasis** back where it belongs: on **driver skill and racecraft**.

Even with its performance boost, the F400+ Class remains **highly cost-effective**. Thanks to its **sealed-engine** format and strict **no-modification** philosophy, racers will benefit from **lower overall costs** and reduced maintenance making elite performance more accessible than ever before, delivering a **faster, fairer**, and more **affordable** class that embodies what **competitive** karting should be—pure, **equal**, and **thrilling** racing.

The **F400+ class** will debut in the upcoming 2026 season, with availability, pricing and registration details to be announced soon.

For racers and teams seeking the ultimate balance of power, precision, and parity at an affordable price, the **future of F400 Karting** and in fact 4-stroke karting has arrived. **#JoinTheOrangeEvolution**

About F400 Karting

F400 Karting is a leading force in promoting grassroots motorsport, dedicated to providing accessible, competitive, and high-quality karting experiences. With a commitment to innovation, equality, and performance, F400 Karting continues to push the limits of what's possible for four stroke karts.
